

This is a reminder that the SCO and MVR participation election ends on Monday, March 9, 2020.

On February 11, 2020, Dominion Energy Ohio ("DEO") held a combined Standard Service Offer ("SSO") and Standard Choice Offer ("SCO") Auction to determine the adder price for the coming Auction term of April 2020 through March 2021. Winning suppliers were awarded tranches of customers that they will serve during the Auction period at a clearing price of the closing NYMEX price for the prompt month plus \$0.15. This notice is to inform all existing Energy Choice suppliers that they may elect to serve SCO customers at the Auction clearing price.

#### Standard Choice Offering "SCO"

All Energy Choice suppliers who did not participate in the Auction and were not awarded tranches can elect to participate in the rotating assignment process, serving customers at the SCO rate. To serve as an SCO supplier, the following requirements must be met:

- ? Supplier must maintain an active Energy Choice pool.
- ? Supplier must make a one-time election by March 9, 2020 to participate as an SCO supplier.
- ? Supplier must agree to serve assigned customers at the SCO rate through March 31, 2021.

With respect to SCO service, please be advised that in an Order issued February 26, 2020, in Case No. 18-1419-GA-EXM ("the 18-1419 Order"), the Public Utilities Commission of Ohio ("Commission") approved a modification of DEO's Energy Choice program that may result in additional SCO enrollments, due to the elimination of Monthly Variable Rate ("MVR") commodity service as an option for residential service and for non-residential customers whose annual consumption is less than or equal to 200 Mcf and the addition of SCO service as an option for non-residential customers whose annual consumption is less than or equal to 500 Mcf. Additional information may be found in the 18-1419 Order and related documents.

#### Monthly Variable Rate "MVR"

In addition to the SCO program, all existing Energy Choice suppliers can elect to serve customers whose Energy Choice or opt-in aggregation contracts have expired without renewal and who are no longer SSO eligible. Such customers that have not selected SCO, Energy Choice or Aggregation pooling services will be assigned to electing suppliers under the MVR. MVR customers were not included in the Auction process.

With respect to MVR service, please be advised that in the 18-1419 Order the Commission approved a modification of DEO's Energy Choice program that will result in the elimination of MVR commodity service for all customer classes at various times, with completion expected to occur prior to the conclusion of the March 2021 billing period. Additional information may be found in the Order and related documents.

For so long as MVR commodity service continues, all Energy Choice and SCO suppliers can elect to participate in the rotating assignment process and accept customers at a Monthly Variable Rate, which is not subject to pricing oversight but must not exceed any of Supplier's monthly variable rates posted on the Commission's Apples-to-Apples Chart for the same billing period. To serve as an MVR supplier, the following requirements must be met:

- ? Supplier must maintain an active Energy Choice pool.
- ? Supplier must make a one-time election by March 9, 2020 to participate as an MVR supplier.
- ? Supplier must agree to serve assigned customers at its MVR rate through March 31, 2021, or until such time as MVR commodity service for all affected customers is eliminated and replaced with an alternate commodity service offering under the 18-1419 Order, whichever comes first.

#### Monthly Retail Rate "MRR"

Pursuant to the 18-1419 Order, DEO is in the process of establishing a new service offering that will replace MVR service for non-residential customers whose annual usage is greater than 200 Mcf. MRR commodity service will be priced based on a monthly calculation of median pricing offers, and only suppliers who submit qualifying offers at or below the median will receive assignments in a given month.

Details regarding MRR service, including supplier eligibility requirements and the monthly calculation of the median price may be found in the 18-1419 Order and related documents. DEO will provide additional information regarding the institution of MRR service, including the expected start date of such service, as such information becomes available and is confirmed. DEO is also in the process of developing a standard MRR agreement and will announce and post such agreement once it is finalized.

If you have questions regarding the administration of these programs, please refer to information posted on DEO's SCO/SSO Auction web site located at:  
<https://www.dominionenergy.com/large-business/transportation-services>

If you would like to participate in the SCO, MVR, or both programs, agreements can be found at the Transportation Services' Dekaflow web page at:  
[https://dekaflow.dominionenergy.com/jsp/info\\_post.jsp?company=deo](https://dekaflow.dominionenergy.com/jsp/info_post.jsp?company=deo)

Click on Documentation and you can access both the SCO and MVR agreements posted on February 28, 2020. Completed agreements can be returned to our department by emailing them to [Gas\\_Energy\\_Choice@dominionenergy.com](mailto:Gas_Energy_Choice@dominionenergy.com) by Monday, March 9, 2020.
