

SUBJECT: Storage Inventory Level

As a reminder, all suppliers and customers with Firm Storage Service, Energy Choice Storage or Standard Service Offer Storage must nominate withdrawal volumes in such a manner as to attain minimum on-system storage inventory levels, expressed as a percentage of supplier's capacity, over the winter period.

The ending November 30, 2020 storage inventory must be within 92-95% of the December 1, 2020 assigned capacity. The December 2020 asset allocation sheets will be emailed to all suppliers around November 16, 2020.

Storage holders should refer to Section 5.1 of the Firm Storage Service (FSS) tariff or Section 13.8 of the General Terms and Conditions of Energy Choice Pooling service for further details.
