

DEKAFLOW SYSTEM UPGRADE/OUTAGE
Wednesday, April 22, 2020 from 5am-7am EST

Dekaflow will have a system upgrade 04/22/20 from 5am-7am EST. The system will NOT be accessible during this time. Log out of Dekaflow at the end of your work day today. On or after 7am April 22, launch the application from the Customer Activities link on the Dekaflow home page.

As a reminder, it is best practice to log out of Dekaflow at the end of your work day. Dekaflow implements code changes one or more times/month. Logging out then back in each day ensures you are in sync with the latest code.

After the upgrade, the Reports module, Submit tab will have an Output Selection option. The default value will be PDF. Other options will be DATA or BOTH.

Please contact EOG_Trans_Serv@dominionenergy.com with any questions.
