

Subject: Energy Choice Target Requirement Modifications
Effective: May 9 - 11, 2020

Dominion Energy Ohio (DEO) will be using a three day average temperature as well as an average of the "day of week factor" when posting firm target requirements for Saturday, May 9, 2020 (gas day 9) through Monday, May 11, 2020 (gas day 11). This will apply to the "East Ohio region" only and does NOT affect the "West Ohio" target requirements.

DEO will be posting the preliminary values tomorrow morning, Thursday, May 7, 2020, based on the updated average temperature.

DEO is continuing to monitor the current situation and is actively looking for ways to provide relief for our customers during this difficult time. DEO will continue to communicate as information becomes available.

Please send any questions to EOG_Trans_Serv@dominionenergy.com.

Thank you for all of your understanding and please continue to stay safe!
