

Dominion Energy Ohio
Interstate BTU

Effective April 1, 2021, Dominion Energy Ohio's BTU adjustment for interstate supplies will be:

1.058 for East Ohio
1.074 for West Ohio

These values will remain in effect until March 31, 2022.

This annual re-calculation is described in the General Terms and Conditions of Daily, General, and Full Requirements Pooling Service (Section 3.2) and the General Terms and Conditions of Transportation Service (Section 7.2), which states in part:

"When Transportation Volumes are received by East Ohio on an MMBtu basis, East Ohio will make a heat content adjustment in order to convert Customer's Transportation Volumes to an Mcf basis. For each calendar year, East Ohio will calculate the weighted average heat content of all gas delivered to East Ohio by Upstream Pipelines during this period. This Heat Content Adjustment Factor, expressed as MMBtu per Mcf, will be used to adjust all Transportation Volumes received during the following twelve (12) month period commencing on April 1."
