

NO INCREASE ORDER EFFECTIVE FRIDAY, FEBRUARY 5, 2021 (GAS DAY 5) UNTIL FURTHER NOTICE

Dominion Energy Ohio (DEO) has determined that to maintain system integrity during the upcoming period of colder than normal temperatures and to limit on-system supply deliveries into its eastern section, the following No Increase Order is necessary.

Starting with the Timely Cycle nominations for Friday, February 5, 2021 (gas day 5), the volumes nominated and confirmed for Eastern Gas Transmission and Storage, Inc., receipt location ML001, cannot exceed the confirmed Timely Cycle nominations for Wednesday, February 3, 2021 (gas day 3). Nominations in excess of this standard, while these restrictions are in effect, will be rejected or reduced accordingly.

Please note that shippers with requirements that are assigned and supplied via the TGP Cochrannton interconnect will not be impacted by this No Increase Order. DEO expects that end-users and marketers will continue to match their anticipated burn/targets with equivalent levels of supply. If additional supply is needed in excess of the restricted volumes stated above, volumes may be nominated from the Nexus Gas Transmission (Meter #N1002), ANR Pipeline (Meter #108641) and Panhandle Eastern (Meter #EOHIO) receipt points, and (on a limited basis) from Tennessee Gas Pipeline (TGP) via the Gilmore (Meter #420934) receipt point.

DEO may extend these restrictions, in whole or in part, and/or issue additional restrictions if necessary, based on future operating conditions. This advisory is issued pursuant to DEO's tariff on file with the Public Utilities Commission of Ohio.
