Subject: QPTM We are live

Notice Text:

To: All external DEWV Dekaflow/QPTM users
Subject: QPTM We are live
Date: September 27, 2021

We are happy to announce that we are live with QPTM as of today
You have been given access to the QPTM Production/PRD environment this morning and we've seen many of you logging in and interacting with QPTM. On behalf of Dominion Energy West Virginia, we would like to thank you for your cooperation for a smooth transition.

For your convenience, we wanted to summarize some of the key information about QPTM and Dekaflow that we've shared over the past weeks.

QPTM Production/PRD versus QPTM Training/UAT Environment
Both the Production environment and the training environment designated as the UAT environment can be accessed through same web address <https://login.myquorumcloud.com/app/UserHome> and login credentials. As a reminder, please ensure that you are logged into the Production/PRD environment when conducting your business. This is the live environment and is to be used for all business going forward. You can leverage the Training/UAT environment for training purposes. After logging in, you will be able to select either the Production/PRD environment or the UAT environment. Hovering over the Dominion Resources Services Midstream text below the logo will reveal which environment the button accesses PRD vs UAT

Please note that your access to the QPTM Training UAT environment will be revoked on September 30.

Access to Dekaflow:

QPTM will include historical data for production months June through September, but this information is for reference only. Dekaflow is the system of record for those months.

Please note that any requests made through Dekaflow related to October flow will not be processed.

Thank you for helping us make this transition successful.
We look forward to working with you to continue to meet the needs of our customers.
Please don't hesitate to contact us with any questions at DEWVTransServ@dominionenergy.com.
