

SUBJECT: Storage Inventory Level

As a reminder, all suppliers and customers with Firm Storage Service, Energy Choice Storage or Standard Service Offer Storage must nominate injection volumes in such a manner as to attain minimum on-system storage inventory levels, expressed as a percentage of supplier's capacity, over the summer period.

The ending April 30, 2021 storage inventory must be within 4-13% of the May 1, 2021 assigned capacity. The May 2021 asset allocation sheets will be emailed to all suppliers around April 16, 2021.

Storage holders should refer to Section 5.1 of the Firm Storage Service (FSS) tariff or Section 13.8 of the General Terms and Conditions of Energy Choice Pooling service for further details.
